

Dynavox

Try out the free 30 day software on their iPad, iPad mini, or Windows based tablet/computer, the link to sign up is www.mydynavox.com.

1. The full Word Power user is in the DynavoxT10...on the website only the 60 button was shown, but all levels are available at no charge
2. The application can be “closed” from the user making changes. When the application is in use, it is open; however, a password can be set to protect editing, tools, and settings
3. Until November 1st, 2013, for orders that are a direct purchase, the device is \$3999...after November 1st, the price for direct orders is \$4500. If going through insurance, the device is \$7500
4. The software version is Android 4.0.4
5. The battery will run for over 10 hours with continuous, typical use
6. Switches are compatible with the DynavoxT10
7. One application subscription = one installation, so the same app cannot be used across different users. Multiple applications are required for multiple tablets; however, with the purchase of a tablet, the application is free. Currently the app is \$29.99/month. Until November 1, 2013, to the first 1,000 subscribers, the app is \$99.99/year. Regularly, the app is \$299.99/year
8. The content on the application is identical to the DynavoxT10 Compass software
9. When synced, your pages on the DynavoxT10 and personal iPad or Windows based tablet will be identical
10. Technical support stated that the screen is very durable for this type of device and it's wide range of users

Thank you again...please let me know if you have additional questions. Have a great weekend.
